DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Applicants are required to elect a specific species from each group listed below.

- A. A specific cell as stated in claim 2.
- B. A specific recovery process/technique as stated in claim 3 (h).
- C. A specific antigen as stated in claims 4 and 6.
- D. Whether a detergent is used or not as stated in claim 3 (d) and claim 11.
- E. A specific purified protein as stated claim 16.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

- A. Claim 2 requires a specific cell, all other claims are generic.
- B. Claim 3 (h) requires a specific recovery process/technique, all other claims are generic.
- C. Claims 4 and 6 require a specific antigen, all other claims are generic.
- D. Claims 3 and 11 require a specific step (d).
- E. Claim 16 requires a specific purified protein, all other claims are generic.

The following claim(s) are generic: all claims are generic with regard to at least one of the variables listed above.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the claimed cells are prokaryotic and eukaryotic, the processes include various columns methods, the antigens are either viral or not, whether a detergent is or used or not and purified proteins are various distinct proteins. Therefore, the claimed species are physically, chemically and functionally distinct.

Summary

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
